

Creatures

- [Vargouille](#)
- [Cranium Rat](#)
- [Incantifer](#)
- [Time Dragon](#)

Vargouille

“Fiendish creatures spread by a curse-like disease, though I’ve never heard of them doing that face-change thing to look like someone they’re attacking. That’s probably what’s wrong with Fulton and Mario. The [Bakers](#) probably all had it, too. If we’d fought them, their heads would have attacked us afterwards.”

Cranium Rat

Individually they are mostly harmless, but they are psychically linked with the others of their swarm. Swarms have a gestalt personality, separate from the individual rats, that grows rapidly in power and intelligence with the size of the swarm.

Incantifer

A type of wizard with the ability to absorb magic energy from spells and magic items, and use that energy in the place of food, water and sleep. But they're not entirely still alive and don't heal naturally from injuries. The party met one at the Ice Bar at [Fortune's Wheel](#). She said she was celebrating her birthday.

Time Dragon

Blue skinned. Breath causes things to rapidly age and decay.
